VIVA

(ii) Generalization

It is a process of putting all the common entities in on group (super class) and using them in subgroups (sub classe).

Ey:

Specialization

An entity is divided int sub-entities based on their characters. like a higher level entity is specialized into two or more lower level entity.

Ey   Employee can be a Developer or a

manager

(i) completion transition

In a state diagram if a transition moves to the end state of the diagram then that transition is called completion transition
